

The secret life of an IBC

who knows what it's getting upto when it's empty!

No matter how clean it might look, a used rigid IBC provides a great environment for germs to go wild. Unlike a rigid IBC, the collapsible all plastic bag-in-box Combo unit from Arlington will ensure a clean fill every time:

- Zero risk of contamination or taint from the IBC,
- Zero risk of environmental contamination including O₂,
- Space efficient for storage and transport,
- Cost effective, no cleaning, no chemicals.
